

Masterclasses

for exceptionally able pupils

MILDENHALL, SUFFOLK ENRICHMENT & EXTENSION WORKSHOPS SUMMER 2019

A BIG THANK YOU TO St Mary's for hosting all the masterclasses:
St Mary's Primary Academy, Trinity Ave, Mildenhall, Bury St Edmunds IP28 7LR

These Masterclasses are for gifted students in Years 1-7 and they run for a whole day at the weekend. We also have programmes in West Midlands, Cheshire, London and Lincoln.

We ask for a minimum contribution of £45 per child per class. Please feel free to donate more if you are happy to do so.

You may apply for more than one class. Children need to bring a packed lunch and refreshments for the day – no school uniform needed!

We ask SCHOOLS to distribute this information to pupils who they feel would benefit – parents can deal with us directly if the school prefers not to co-ordinate bookings. Alternatively, email Patricia to hold places for your students. We are able to give bursaries to children who have free school meals or whose families receive income support – APPLY FOR A BURSARY ON OUR WEBSITE.

We are also pleased to be able to offer parents a 50% DISCOUNT ON YOUR NEXT MASTERCLASS if you recommend us to one of your friends and they book for the first time with us.

NEW! 'Parents' Net' puts parents of gifted children in touch with each other and gives access to our online noticeboard: www.tomorrowsachievers.co.uk/parents-net

HOW TO BOOK

"Any parent who does not take up the opportunity to send their child on one of these sessions is missing something quite unique"

A parent's view of Tomorrow's Achievers masterclasses

Date and time	Title and description	Year groups
Sunday 19 th May 2019 10am – 2.30pm	<p>Ice Age, Dinosaurs, Bones and Stones</p> <p>Explore the world of Ice Age East Anglia. From overgrown forests and dangerous plains to chilly tundra, from hippopotami to woolly mammoths, this area of the country has seen great changes in its landscape and wildlife over the last 500,000 years. Handle Paleolithic tools and Ice Age fossils and learn how to represent them using different art methods. Examine fossils beneath the microscope and make detailed studies to take home. An unusual and exciting masterclass aimed to develop awareness of, and artistic responses to, the ancestral origins of our natural world.</p> <p style="text-align: right;"><i>Led by Stephanie Hartick</i></p>	1 to 3
Sunday 19 th May 2019 10am – 3pm	<p>Writing for Fun!</p> <p>Language-lovers required! Join Claire for a wonderful day of creative writing! Learn how to grab your reader's attention and develop intriguing characters, plots and language; discover useful tricks for overcoming writers block! You will practice creative-writing activities and learn how to draw inspiration from unsuspecting inanimate objects and use your creativity to make them come alive both on the page and in your own imagination! A sense of adventure and a good imagination are all that is required!</p> <p style="text-align: right;"><i>Led by Claire Edmeades</i></p>	4 to 6
Sunday 19 th May 2019 10am – 4pm	<p>Become an Inventor for the Day</p> <ul style="list-style-type: none"> · What is an invention and why is it important to invent new things? · Learn about the world's biggest inventions of the past centuries and how they have made our lives easier. · Discuss which invention is the most important and why. · Invent something new and exciting on your own or in a group of other young and talented people and produce a prototype from recyclable materials. · Broadcast your invention to a judging panel and participate in a competition. <p style="text-align: right;"><i>Led by Agnieszka Hercog</i></p>	5 to 7
Sunday 19 th May 2019 10am – 4pm	<p>Movie Making with the iPad including Green Screen</p> <p>The iPad is an incredible machine. You can create incredible movies using a few different apps. Have you ever wanted to do some Green Screen work and put yourself into a place you've always dreamed of going? How about the top of the Eiffel Tower? Or space walking amongst the stars? Or even being chased by a train? Or how about doing a weather report on the great British weather? Or even use special effects to create an Earthquake or Alien Invasion? During this Masterclass you will experience using different apps on the iPad to create wonderful professional looking movies. Learn the techniques of camera work with the iPad and how you can get the best sound quality. Learn about Green Screen and using different techniques to create special effects. Learn about soundtracks and creating your own to enhance the movie you have created. This Masterclass is for anyone who loves making movies and it's all done on the iPad. Please bring along your iPad if you have one with iMovie, Garageband, Keynote and Green Screen Apps Installed.</p> <p style="text-align: right;"><i>Led by Richard Poth</i></p>	5 to 7
Saturday 22 nd June 2019	<p>Making Sense of Senses</p> <p>How many senses do humans have and how do they compare to those of animals? Which of your senses is particularly strong? Can you communicate without words?</p>	1 to 3

10am to 2.30pm	<p>Can you guess what you taste, smell or touch with a blindfold? After a few interesting experiments and surprising results you will discover what influences your senses. You will have lots of fun trying to make sense of senses but please make sure you let us know of any allergies!</p> <p style="text-align: right;"><i>Led by Agnieszka Hercog</i></p>	
<p>Saturday 22nd June 2019</p> <p>10am to 3pm</p>	<p>Space, Solar Energy and Film Makers</p> <p>Come along to design and build your own building, landscape, monster or 3D sculpture using recycled materials. Join others to create a new city. A hands on exciting outdoor workshop thinking about large and small scale models. In the afternoon we will make botanical sun prints to take home and film inside your model. Wear old clothes and be prepared for a fun filled day. Please bring a cardboard box along with any extra materials, designs and ideas you may wish to use.</p> <p style="text-align: right;"><i>Led by Stephanie Hartick</i></p>	3 and 4
<p>Saturday 22nd June 2019</p> <p>10am to TBC (depending on ages booked)</p>	<p>The Ancient Land of the Rubik Cube</p> <p>There was once a strange object. It had four corners, 6 lands of different colours, and a fascinating world of colour, adventurous edges, twists and turns. It wasn't flat and it wasn't circular. Everything was all very straight up and down. As soon as people discovered this strange object, they became fascinated with its endless adventures and held on to it tight. The hands of time turn and the strange object has returned. This time with more mystery and intrigue. It has secrets and knowledge from the great masters to share, but first you must enter its twists and turns and solve the 6 challenges of each land. Will you be able to say goodbye?</p> <p style="text-align: right;"><i>Led by Tracey Martin and/or Muny Thach</i></p>	3 to 7

If you wish to be removed from our mailing list, please tell us know, as this will help our charity keep costs down.
